SAMBIT NAYAK, MS - HCI

Product Designer | San Francisco, CA | 317-414-9720 | sambitnayak.ux@gmail.com | linkedin.com/in/sambitnayakux | sambitnayak.com

SUMMARY

Product Designer with experience across AI startups and enterprise, often as the founding designer. Work spans agentic AI, creative tools, enterprise software, and e-commerce. Cut time to first content 43% at Salesforce and shipped a 3D Fit viewer with 120M+ interactions that cut returns 26% at Gap Inc. A designer who codes: prototypes and ships in React and Next.js to test real interactions before committing.

PROFESSIONAL EXPERIENCE

Founding Product Designer Jun 2025 – Present

CotonAI Inc. | *Remote, US*

- Led end-to-end design of an AI-native creative platform, owning product strategy, UX architecture, interaction design, and the design system; shipped 4 core and 16 sub-mode AI creation workflows, contributing to early traction and a 20-brand waitlist.
- Designed human-AI interactions spanning visual prompting, sketch-to-image generation, contextual editing, and collaborative canvas workflows; defined interaction patterns for agent orchestration and persistent creative memory, enabling 4x more design variations and 60% faster rendering.
- Built collaborative design and feedback experiences for a customer pilot (140+ AI-generated designs, 188 contextual review comments), achieving 71% first-pass acceptance and cutting design iterations from 3–5 to 1–2 cycles.
- Translated creative industry workflows into scalable AI creative experiences, supporting 2,000+ image generations in 15 days and about 5,000 monthly creative assets for a production customer, reducing asset turnaround from 2 weeks to 1 week.

Product Designer (Apprentice, Academic Credit) Aug 2025 – Apr 2026

Salesforce | *Indianapolis, IN*

- Designed and prototyped in code an AI assistant answering technical Salesforce product questions from official docs, release notes, and community threads; 75% of experienced users in testing would choose it over ChatGPT.
- Drove a 43% reduction in time to a learner's first piece of content with a one-click recommendation based on certifications and past activity; session duration was 35% higher on recommended content than on self-discovered content.
- Shaped three product directions, including an AI agent experience, by owning research operations (ResOps): screened 650+ candidates into a pool of 72 and coordinated 20 interview sessions.
- Used React, the OpenAI API, Supabase, and Agent Builder to build working prototypes and test real interactions with users.

Founding Product Designer May 2025 – Aug 2025

Darzy.AI | *Remote, US*

- Led product design, UX research, ICP definition, and strategy for an AI-powered B2B2C e-commerce platform; built high-fidelity prototypes across iOS, Android, and web. Owned brand identity and landing page, increasing site visits by 143.9%.

Product Designer Nov 2021 – Aug 2024

Gap Inc. | *Hyderabad, India*

- Founding team member of Drapr (YC W20); designed B2C AI product discovery, fit intelligence, and personalization workflows.
- Launched a 3D Fit viewer (120M+ interactions): click-through up 80%, sales up 23%, returns down 26%.
- Shipped 4 AI plugins and processes with 90% pipeline efficiency; awarded Best Team FY2023.
- Directed a cross-functional team of 10 across AR try-on and 3D product initiatives.

Co-Founder and Head of Design Nov 2020 – Oct 2021

WeWeave3D | *Remote, India*

- Built an enterprise B2B 3D clothing configurator and led product strategy and go-to-market, reaching $7,000 MRR.
- Cut development lead time 50% by turning complex technical workflows into human-centered interfaces for fashion export houses.

EDUCATION

Master of Science, Human-Computer Interaction, Indiana University Indianapolis Aug 2024 – Apr 2026

Merit Scholarship; IU Jagstar Startup Winner 2026; SIGGRAPH

Bachelor of Design, National Institute of Fashion Technology (NIFT), New Delhi Aug 2017 – Aug 2021

Innovator's Award; GPA 3.6

SKILLS

Design and Research: AI UX, Agent UX, Enterprise UX, Product Design, Interaction Design, Visual Design, Motion Design, Design Systems, Information Architecture, Prototyping, Service Design, Systems Thinking, Data Visualization, 0→1 Product Design, User Research, Usability Testing, Contextual Inquiry, Diary Studies, Surveys, A/B Testing, Competitive Analysis

Tools and Technology: Figma, Framer, ProtoPie, Photoshop, Illustrator, HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS, Cursor, Claude, ChatGPT, Codex, Supabase, Vercel, Railway, Cloudflare, PostHog, GitHub, Jira, Confluence, Notion
